Branches/Offices: Silicon Valley and Nationwide

## I. Company Introduction

**United Computing Inc. is the most promising business powering the US/world** with WinAll innovations ending smartphone era and New Earth jobs & businesses systematically consistently solving the toughest chronic US/world problems over time. All our major technical/political/economic predictions have or will come true for the past decade and future. Here we mass market our businesses to defeat zombies Alphabet/India and Apple/Amazon/Tesla and punish other thieves, along with our tons of jobs for qualified mass layoffs, low income people, etc. to build New Earth efficiently together and various affordable quality products provided or made in our standalone diverse self sustainable smart communities.

## II. WinAll Products Ending Smartphone Era

**1) Smartphone era is now ending with our WinAll products/innovations for work & play in any body pose/time/place and replace special purpose phones/tablets, big heavy PCs, and niche gaming/AR/VR devices.** WinAll includes XR glasses for multiple virtual monitors/screens/windows, physical or virtual keyboards/multi-touch/3D inputs, Windows gaming computer tablet phones, optional power banks, etc. We've used them for 10+ months of 8+ hours of work & play daily, without which we feel quite inconvenient or uncomfortable already. These addictive products will hit the market like iPhone 1+ for sure.

**2) We own this top tech innovation** since mid 2008. Tech giants built their XR products but all failed, and can't steal from us due to cross competitions, let alone others. **Alphabet/Apple die** out of our WinAll innovations and Microsoft/PC replacement products Windows, Bing, AI, cloud, PCs, etc. **Everyone simply needs to get the big picture** of what WinAll really does/means to end cancerous smartphone era and zombie Alphabet/Apple quickly. Eventually we will market WinAll directly at major wireless retailers AT&T, T-Mobile, Verizon, etc.

**3) WinAll Gen 1/2 products, especially many Birdbath and Waveguide XR glasses, are on sale at <https://www.unitedcomputing.org/shop>.** Consumer XR glasses alone have reached \$10.5 billion revenue in 2024 and 12+ times and increasing growth rates in the future. Attached ProductAds.jpg also includes a list of our WinAll Gen 1/2 products. **Please order WinAll products from our shop only unless notified otherwise later and abandon Alphabet/Apple products now, for mutual protection/benefits!**

## III. New Earth Jobs & Businesses

The super destructive/cancerous competitions among major tech giants/nations over our WinAll innovations led to huge debts/crimes for over a decade and our New Earth businesses. **Microsoft/Alphabet Indian leaderships and Amazon/Tesla are terminated by marketing them too.** **Our New Earth businesses systematically consistently solve the US/world toughest chronic problems by priority over the next 50 to 100 years,** like we are going back in time or forever young with little debt/stock market/population and building new sci-fi worlds or a better future together. Please check the attached BusinessMarketing\_1/2.jpg for more details.

While we are depopulating bad quality businesses/people by priority, we open up tons of jobs/opportunities everywhere for qualified mass layoffs and other people to build New Earth together. Specifically to begin with, **we are aggressively hiring** full-time, part-time, intern, or volunteer managers, lawyers, salespersons, accountants, farmers, engineers, builders, handymen, makers, auto technicians, health professionals, etc. to grow our business nationwide and globally. Ideal candidates are experienced, versatile, smart, hard working, and ethical. **Our business funding and revenues mainly come from:**

- 1) **Our co-ownership/leadership of Microsoft, like next Microsoft/Alphabet**, as gates to most businesses and people that we can bill or influence
- 2) **Our WinAll innovations/products, like next Apple, and relevant major lawsuits** defeating/swallowing top losers/thieves, along with Americans having top power and our New Earth businesses serving them best
- 3) **Our diverse self sustainable smart community businesses, like next all other businesses**, providing major consumptions such as housing, transportation, food, utilities, everyday products, insurances, medical care, clothing, education, pension, infrastructure, etc. or equivalent great salaries and more revenues/profits

**Our hiring priorities are building vertically integrated teams of versatile talents to provide/produce frequent consumptions** in those major domains to complete the consumptions side of a working self sustainable smart community ASAP first. For instance, a team of 10 people may include the founder/manager, 3 chief attorney/sales/accountant, 3 farmers/health professional/maker, 3 builder/handyman/engineer/auto technician/maker. Our teams will market/build WinAll, file lawsuits against competitors, and integrate/build/market our communities.

**Our initial communities are easy to market/build/integrate**, which include available WinAll Gen 1/2 products, affordable quality housing, clean energy transportation, smart high yield integrated vertical aeroponics, aquaponics, and chicken farms, off grid utilities, zero waste products, maker kits/tools/workshops, and so on. After we complete/optimize consumption side of our communities to sustain our teams, we will do the same to the production side till we complete our first vertically integrated communities. Then we market them out, template them, and build/test/market various horizontally integrated communities over time. Future communities will upgrade rapidly over generations like PCs or smartphones.

**Please do help share our messages around** as our businesses matter to everyone. Unity is strength. Our WinAll and New Earth jobs/businesses inevitably end smartphone era/Alphabet/India/Apple/Amazon/Tesla and fine other thieves. Once Microsoft officially joins us, we will have a lot more strengths to defeat our competitors and accumulate more resources for our businesses.

**Our first employees are expected to register and share their relevant resources** priced fairly to help complete the consumption side of our initial communities to sustain our teams ASAP first. They always own those resources like human ones **and get paid** for sharing them along with additional compensations out of their regular work, **directly from our community products** priced fairly too like equivalent salaries/benefits **matching standard** <https://www.bls.gov/bls/blswage.htm>, **similar to regular employees sharing their human resources** or work to get paid. Once Microsoft joins us, or we generate more WinAll profits, win our lawsuits, or sell our community products, we will have more money instead of material forms of compensations to pay our employees. **We will also utilize shared or vacant lands/lots as our business stores, offices, or branches to quickly expand/grow** our business nationwide and globally. These may be a bit untraditional, but again **with our major innovations/predictions all coming true, these business will surely succeed as well.**

**Please check** <https://www.unitedcomputing.org/jobs> **for more details regarding available jobs, and email us your interested roles and resumes.** Feel free to follow up with us through our emails, texts/calls, websites, blogs, memberships, newsletters, etc. Thanks so much for your interests and support. Let's work together towards a better future now!
